airtel

AIRTEL SYNC 2026 · DIGITAL TRACK (ENTERPRISE TRACK A)

Project Udyam Digital

India's MSME Connectivity Journey, Simplified

Making Small Businesses Go Digital in One Sitting (<10 Minutes)

SYNC

THE 10-MINUTE DIGITAL ONBOARDING JOURNEY:

1. Vernacular AI Advisor -> Plain-language needs discovery (Hindi/English)
2. Smart Dynamic Bundles -> Broadband, SIMs, Cloud & CCTV in one bill
3. Instant Smart KYC -> <60s GSTIN & Udyam lookup with local OCR
4. Post-Order Tracker -> Real-time milestone visibility (Zero chase calls)

Empowering 6.3 Crore MSMEs | Transforming 17.6-day procurement into 10 minutes | Unstop Partner

Platform Partner unstop

THE MSME ACQUISITION BOTTLENECK

Current MSME Acquisition: High Friction, Low Conversion

Forensic analysis of 5,000 SMB leads reveals a broken sales cycle where 92.6% of interested leads drop out.

7.36% ACTIVATION RATE

Only 368 of 5,000 leads activate

Rs. 15,053 BLENDED CAC

Rs. 5.54M total sales spend across cohort

17.62 DAYS VELOCITY

Average 3.01 customer status chase calls

ACTUAL MSME FUNNEL PROGRESSION (5,000 LEADS)

1. Leads Generated: 5,000 | 100.0% (Starting Cohort)
2. Contacted: 3,406 | 68.1% (-1,594 unreachable / no time)
3. Needs Assessed: 1,974 | 58.0% (-1,432 visit unscheduled)
4. **Quote Accepted: 861 | 43.6% (-1,113 STEEPEST DROP!)**
5. KYC Complete: 588 | 68.3% (-273 paperwork / doc trap)
6. Fully Activated: 368 | 62.6% (-220 install delay / cancel)

** Steepest drop: Needs Assessed to Quote Accepted (-56.4%) due to 5-day wait & jargon.*

ROOT-CAUSE OF 4,632 DROPPED LEADS

Scheduling Friction (827 leads):
Owner had no time for visit (531), visit unscheduled (296).

Quote Delays & Jargon (385 leads):
Quote too complex to decipher (206), took 3-5 days to arrive (179).

KYC Documentation (273 leads):
Missing GST/Udyam doc (94), paperwork too long (79), mismatches (47).

Install Delays & Churn (220 leads):
Install delayed >21 days (98), customer cancelled pre-install (53).

TAKEAWAY: 48.8% of drops (2,264 leads) stem from manual sales & paperwork friction.

CORE PRODUCT ARCHITECTURE

Project Udyam Digital: Architecture of Frictionless Acquisition

Replacing multi-week sales cycles with an intelligent, self-service 10-minute digital onboarding journey.

1. Conversational Advisor

Vernacular Needs Discovery

- Plain Hindi & English discovery
- Demystifies complex telco jargon
- Recommends 3-tier smart bundles
- Offline deterministic rule fallback

2. Dynamic Bundle Engine

Transparent Pricing & Rules

- Powers 25 enterprise SKUs
- Enforces dependency graph rules
- Validates GSTIN across 10 SKUs
- Single monthly bill + setup fees

3. Instant Smart KYC

Sub-Second Verification

- Mock GSTIN & Udyam API lookups
- Auto-deskews & checks blur (K04)
- Freshness check (<90d anchor 2026)
- DPDP 2023 consent & 30-day purge

4. Post-Order Tracker

Proactive Milestone SLA

- 5-stage provisioning state machine
- Live technician contact & schedule
- Automated WhatsApp webhooks
- Eliminates 3.01 customer calls

O2O CHANNEL PARTNER & FIELD FORCE SYNERGY (ASSISTED DIGITAL MODEL)

Instead of competing with local retail dealers and field agents, Project Udyam Digital equips them with digital attribution QR codes and back-office drop-recovery queues. Partners earn full recurring commissions while offloading manual documentation, transforming them from paper pushers into trusted digital advisors.

USER EXPERIENCE & PROTOTYPE DESIGN

Intuitive, Mobile-First Prototype Experience

Proposed prototype screen designs engineered for 375px mobile viewports with bilingual Hindi/English support.

1. AI Conversational Advisor

WhatsApp-style bilingual chat: 'Namaste! How many staff work at your clinic?' Quick suggestion chips for zero typing.

2. Recommended Bundles

3 transparent cards (Starter Rs. 1,298, Growth Rs. 2,597, Pro Rs. 6,896) with plain-language business rationales.

3. Modular Quote Builder

Interactive toggles for add-ons: Cloud CCTV (+Rs. 249), Static IP (+Rs. 200). Live total updates; zero hidden clauses.

4. Instant Registry Check

GSTIN & Udyam entry triggers sub-second lookup; displays green 'Active' badge and auto-fills business details.

5. Smart KYC & Blur Trap

Auto-deskews tilted photos (K02); intercepts blurry docs (K04) and expired electricity bills (K11 >90 days).

6. Live Order Tracker

5-stage visual progress timeline: Assigned technician Amit Sharma, contact card, and scheduled appointment.

** Proposed prototype interface specifications. Designed for zero-training adoption by non-technical Indian proprietors.*

SYSTEM ARCHITECTURE & PRIVACY

Modular Monolith Architecture with Privacy-by-Design

Decoupled FastAPI backend, local vision OCR processing, and strict DPDP Act 2023 compliance.

SYSTEM COMPONENT TOPOLOGY

Presentation Tier:
React 18, TypeScript, Tailwind CSS, Bilingual i18n

API Gateway Tier:
Python FastAPI, CORS middleware, Pydantic validation

Core Service Modules:
Advisor Adapter (with offline rule fallback), Catalog Engine (25 SKUs), Smart KYC Orchestrator, Order State Machine, Partner Co-Pilot

Offline Registry Engines:
Indexed Mock GSTIN (3,534 records), Mock Udyam (2,723 records), Local OCR Pipeline (Laplacian blur variance + deskew)

Persistence & Vault:
SQLite (Local MVP) / PostgreSQL (Cloud), AES-256 Encrypted 30-Day Vault, Immutable DPDP Audit Ledger

DPDP ACT, 2023 TRUST & PRIVACY CONTROLS

Affirmative Consent (Sec 6):
Unbundled checkboxes in Hindi & English; immutable consent timestamp & IP hash.

Purpose Limitation (Sec 5):
KYC data processed strictly for statutory telecom onboarding; zero secondary use.

Data Minimisation (Sec 6(1)):
No GSTIN required for retail broadband; only minimum statutory ID & address captured.

Zero Cloud PII Leakage:
100% local OCR execution; customer documents are never sent to external AI APIs.

Storage Limitation (Sec 8):
Automated 30-day purge of document images post-activation; encrypted vault.

PII Masking & Sanitation:
Signatory IDs and phone numbers masked in UI and logs (e.g. XXXXXX9821).

UNIT ECONOMICS & VALUE CREATION

Sustainable Unit Economics & Quantified Business Impact

Slashing customer acquisition costs by 70% while accelerating conversion and recurring ARPU.

BASELINE FUNNEL (ACTUAL DATASET) VS. PROJECT UDYAM DIGITAL TARGETS

Funnel Conversion Rate:	Base: 7.36% (368 / 5,000 leads) -> Target: 18.5% – 22.0% (+2.5x lift)	Removes visit scheduling friction & 5-day quote wait
Blended CAC per Activated SMB:	Base: Rs. 15,053 per activation -> Target: Rs. 4,200 – Rs. 4,500 (-70%)	Shifts from feet-on-street to zero-touch digital self-se
Average Activation Velocity:	Base: 17.62 Days (Median: 17d) -> Target: 2.5 – 3.5 Days (-80%)	Sub-second digital KYC pass-through & instant scheduling
Status Chasing Inbound Calls:	Base: 3.01 Calls per customer -> Target: < 0.5 Calls (-83%)	Live visual milestone tracker & automated WhatsApp updates
6-Month Customer Churn:	Base: 15.22% (56 / 368 churned) -> Target: < 7.5% (-50%)	Needs-based right-fit recommendation vs sales quota pitching

Recurring ARPU Expansion

Broadband + SaaS Subscriptions

Generates predictable monthly cash flows: Micro retail averages Rs. 2,470/mo, professional offices average Rs. 6,796/mo, multi-site businesses reach Rs. 31,233/mo on a single bill.

High-Margin Cross-Selling

SaaS, Security & CCTV Add-ons

Modular upsells like Cloud Backup (P17), Endpoint Security (P20), and Cloud CCTV (P23) deliver >70% gross margin with zero incremental field visit costs.

Assisted Digital O2O Synergy

Channel Partner Commissioning

Local retail dealers and field agents earn a 12% recurring revenue share on digital QR sign-ups. Payback period drops from 6.1 months to 1.8 months.

ROADMAP & STRATEGIC VISION

90-Day Execution Roadmap & Vision for India's MSMEs

Structured rollout roadmap delivering enterprise-scale digital adoption across Tier 1 and Tier 2 clusters.

Phase 1: Days 1–30

Core MVP Foundation

- Deploy FastAPI modular backend
- Ingest 25 SKUs & dependency rules
- Index mock GSTIN & Udyam registries
- Build mobile React wizard with i18n

Phase 2: Days 31–60

Smart KYC & Vision

- Local blur detection & auto-deskew
- DPDP 30-day vault purge automation
- Pass K01-K12 assertion test harness
- Order state machine & milestone API

Phase 3: Days 61–90

Pilot & Partner Co-Pilot

- 2-city pilot (Jaipur Tier 2 & Kolkata)
- Deploy Partner attribution QR console
- Drop-recovery queue for field reps
- Measure conversion & CAC lift

WHY PROJECT UDYAM DIGITAL MATTERS

Project Udyam Digital bridges the gap between India's enterprise telecom infrastructure and 6.3 crore MSMEs. By replacing physical paperwork with AI and multi-week delays with instant trust, we convert friction into a 10-minute reality.

Key Outcomes: [6.3 Cr MSMEs Empowered] [70% CAC Cut] [10-Minute Onboarding] [100% DPDP Act Compliant]
